

# Sphero Golf with the Mats

Code. Test. Drive.

**Code a robot, test it,  
and make it work better.**

**1**

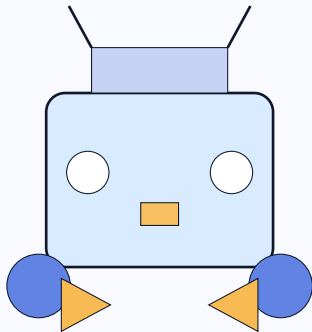

Code it

**2**

Test it

**3**

Tune it

# Today's Mission

## Our focus

Use code to move and control a robot.

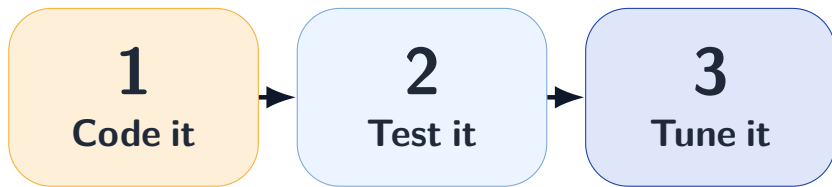

- ▶ I can finish my work.
- ▶ I can show one smart choice I made.
- ▶ I can share my work with a screenshot, demo, or quick talk.

### Grade 4

Code a robot,  
test it, and make  
it work better.

Keep the next  
step visible and  
keep trying.

# How We Will Move Through It

## What to keep in front of you

- ▶ Watch the first step.
- ▶ Use the checklist or example.
- ▶ Pause, check, and keep going.

# If You Get Stuck

## Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Device-to-robot pairing  
and setup can split  
attention quickly.

One partner may take  
over unless roles are  
named and revisited.

Students may change  
too many variables at  
once and lose track

## Show What You Learned

**I can finish my work.**

**I can show one smart choice I made.**

**I can share my work with a  
screenshot, demo, or quick talk.**

Finish strong

Save it, share it, explain it, or demonstrate it.
