

Intro Typing and Simple Circuits

Try. Check. Fix.

Use the tool carefully and solve one tech problem.

1

Try it

2

Check it

3

Fix it

Today's Mission

Our focus

Keyboard entry, simple circuits, and early sequencing routines

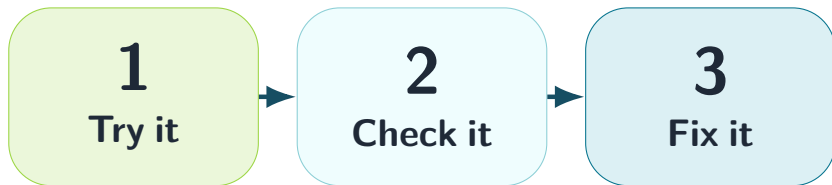

- ▶ Students produce a visible action, artifact, or explanation tied
- ▶ Teacher records one note, screenshot, or observation that can
- ▶ The packet keeps links to both the evidence summary

Kindergarten

Use the tool carefully
and solve one
tech problem.

Keep the next
step visible and
keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Open with a short model that names the lesson focus: keyboard
- ▶ Keep one visible success criterion or checklist posted during work time.
- ▶ Build in one stop-and-check moment for debugging, peer talk, or reset.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

If directions feel tricky,
check the example.

Look for the success
check on the slide.

Slow, clear steps
beat rushing.

Show What You Learned

Students produce a visible action, artifact, or explanation tied

Teacher records one note, screenshot, or observation that can

The packet keeps links to both the evidence summary

Finish strong

Save it, share it, explain it, or demonstrate it.
