A goal for the sneaker store

“Sell more.”

What information is missing?

Today: school slide 9 notes,
then review Q4, Q5 and Q8.

SMART goals in Chapter 2

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

Specific: sneaker sales
Measurable: 20 to 24 pairs per week
Achievable: past sales and enough stock
Results-focused: increased sales
Time-bound: by November 13

Match each criterion to the goal.

Fictional model: assume the team previously sold 24 pairs and has enough stock. Figure 2.2, p. 21.

A checkpoint before the deadline

Goal: 24 pairs sold in one week by November 13

What smaller result could we check before November 13?

Use the milestone definition on p. 21. Suggest a checkpoint and date.

Four steps for a milestone

1 **Define the checkpoint and date**
Sell 22 pairs in one week by October 30.

2 Explain how to reach it
Repeat the successful promotion with available stock.

3 Measure progress: check the weekly sales log.

4 Review results and adjust the plan if needed.

Chapter 2 independent review

Use your existing Test Your Knowledge worksheet.

Q4 Explain why identifying the target market matters.
Reference: p. 23 and Chapter 1 notes.

Q5 Write a brief paragraph on plan elements and purpose.
Reference: p. 19. Recheck the appendix on Thursday.

Q8 Name and explain all five SMART criteria.
Reference: pp. 20–21, Figure 2.2.

Then finish missing Q1–3. Save answers for Friday’s test review.

Preparation for Friday’s Chapter 2 test

First, recall without looking
Explain SMART. How does a milestone support a goal?

Then check and correct your existing answers
Q4: why the target market matters
Q5: how plan elements serve a purpose
Q8: all five criteria, using Figure 2.2 on p. 21

Save your work. Flag one unclear point for help before the test.
