A goal for the sneaker store

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

What makes this goal clear and checkable?

Fictional example Think first. Be ready to point to one detail.

Specific

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

What exactly will increase?

Chapter 2 pp. 20–21 Figure 2.2

Specific

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

What exactly will increase?

Sneaker sales

Chapter 2 pp. 20–21 Figure 2.2

Measurable

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

Which numbers let us check progress?

Chapter 2 pp. 20–21 Figure 2.2

Measurable

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

Which numbers let us check progress?

From 20 to 24 pairs per week

Time-bound

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

When must the store reach the goal?

Chapter 2 pp. 20–21 Figure 2.2

Time-bound

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

The store sells 20 pairs a week. The same team has sold 24 before and has enough stock.

When must the store reach the goal?

By November 13

Chapter 2 pp. 20–21 Figure 2.2

A milestone before the final goal

By November 13, increase weekly sneaker sales from 20 to 24 pairs.

What smaller result could we check before November 13?

Suggest one checkpoint and a date. Chapter 2 p. 21.

A milestone checks progress

1 Checkpoint: 22 pairs in one week by October 30.

2 Action: repeat the promotion with available stock.

3 Measurement: check the weekly sales log.

4 Review: examine the results and adjust the plan.

Chapter 2 pp. 22–23 Final goal: 24 pairs per week by November 13

Chapter 2 independent review

Use your existing Test Your Knowledge worksheet.

Q4 Why does identifying the target market matter?
p. 23 and Chapter 1 notes

Q5 Explain the plan’s elements, design and purposes.
Brief paragraph using p. 19

Q8 Name and explain all five SMART criteria.
pp. 20–21, Figure 2.2

Then finish missing Q1–3. Save your work for test preparation.

Preparation for Friday’s Chapter 2 test

First, recall without looking
Explain SMART. How does a milestone support a goal?

Then check and correct your existing answers
Q4: why the target market matters
Q5: plan elements, design and purpose
Q8: all five criteria using Figure 2.2 on p. 21
