

# Interactive Word Wall Build

Plan. Code. Debug.

**Use code steps to  
make something  
happen on purpose.**

**1**

Plan it

**2**

Code it

**3**

Debug it

# Today's Mission

## Our focus

Maker-supported vocabulary, communication, and explanation

- ▶ Students produce a visible action, artifact, or explanation tied
- ▶ Teacher records one note, screenshot, or observation that can
- ▶ The packet keeps links to both the evidence summary

### Grade 1

Use code steps to make something happen on purpose.

Keep the next step visible and keep trying.

# How We Will Move Through It

## What to keep in front of you

- ▶ Open with a short model that names the lesson focus: maker-supported
- ▶ Keep one visible success criterion or checklist posted during work time.
- ▶ Build in one stop-and-check moment for debugging, peer talk, or reset.

# If You Get Stuck

## Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Some groups need

support organizing  
materials and stick-

ing with one plan  
Explaining the design

can be harder than mak-  
ing it without sentence

Debugging is part  
of the learning.

## Show What You Learned

**Students produce a visible action, artifact, or explanation tied**

**Teacher records one note, screenshot, or observation that can**

**The packet keeps links to both the evidence summary**

Finish strong

Save it, share it, explain it, or demonstrate it.
