

Them's the Rules!

Plan. Code. Debug.

**Use code steps to
make something
happen on purpose.**

1

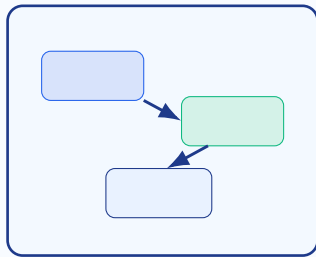

Plan it

2

Code it

3

Debug it

Today's Mission

Our focus

Use code steps to make something happen on purpose.

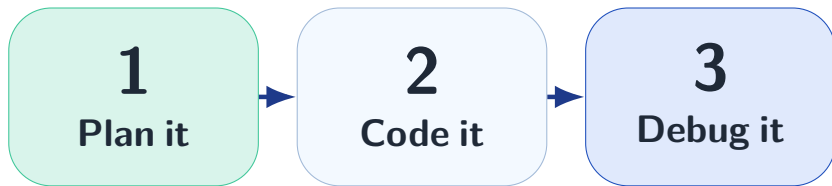

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

Grade 1

Use code steps to make something happen on purpose.

Keep the next step visible and keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Too many examples
at once can blur
the core message.

One small test tells us
more than a giant guess.

Debugging is part
of the learning.

Show What You Learned

Student completes the core task or an accessible version

Student can explain at least one step, pattern, choice,

Teacher captures one proof item: screenshot, observation note, exit

Finish strong

Save it, share it, explain it, or demonstrate it.
