

MineCraft: Cyber Security Home Sweet Hmmm

Build. Code. Test.

**Build and code
your way through a
Minecraft challenge.**

1

Build it

2

Code it

3

Test it

Today's Mission

Our focus

Use Minecraft code to solve a build challenge.

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

Grade 3

Build and code
your way through a
Minecraft challenge.

Keep the next
step visible and
keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Sign-in or menu

navigation can block
learning before

coding even starts.
Skipping direc-

tions can make the
next step harder.

A tiny test is better
than a giant guess.

Show What You Learned

Student completes the core task or an accessible version

Student can explain at least one step, pattern, choice,

Teacher captures one proof item: screenshot, observation note, exit

Finish strong

Save it, share it, explain it, or demonstrate it.
