

Minecraft Coding Fundamentals

Build. Code. Test.

**Build and code
your way through a
Minecraft challenge.**

1

Build it

2

Code it

3

Test it

Today's Mission

Our focus

Agent-based coding, debugging, and computational problem solving in Minecraft Education

- ▶ Students produce a visible action, artifact, or explanation tied
- ▶ Teacher records one note, screenshot, or observation that can
- ▶ The packet keeps links to both the evidence summary

Grade 4

Build and code your way through a Minecraft challenge.

Keep the next step visible and keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Open with a short model that names the lesson focus: agent-based
- ▶ Keep one visible success criterion or checklist posted during work time.
- ▶ Build in one stop-and-check moment for debugging, peer talk, or reset.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Sign-in or menu

navigation can block
learning before

coding even starts.
Skipping direc-

tions can make the
next step harder.

A tiny test is better
than a giant guess.

Show What You Learned

Students produce a visible action, artifact, or explanation tied

Teacher records one note, screenshot, or observation that can

The packet keeps links to both the evidence summary

Finish strong

Save it, share it, explain it, or demonstrate it.
