

# Minecraft: Windmill

Build. Code. Test.

**Build and code  
your way through a  
Minecraft challenge.**

**1**

Build it

**2**

Code it

**3**

Test it

# Today's Mission

## Our focus

Use Minecraft code to solve a build challenge.

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

### Grade 4

Build and code  
your way through a  
Minecraft challenge.

Keep the next  
step visible and  
keep trying.

# How We Will Move Through It

## What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

# If You Get Stuck

## Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Sign-in or menu

navigation can block  
learning before

coding even starts.  
Skipping direc-

tions can make the  
next step harder.

A tiny test is better  
than a giant guess.

## Show What You Learned

**Student completes the core task or an accessible version**

**Student can explain at least one step, pattern, choice,**

**Teacher captures one proof item: screenshot, observation note, exit**

Finish strong

Save it, share it, explain it, or demonstrate it.
