

Responsible Use of Devices

Try. Check. Fix.

Use the tool carefully and solve one tech problem.

1

Try it

2

Check it

3

Fix it

Today's Mission

Our focus

Use technology tools carefully and solve simple problems.

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

Kindergarten

Use the tool carefully
and solve one
tech problem.

Keep the next
step visible and
keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Too many examples

at once can blur

the core message.

A checklist helps

us remember

what to try next.

Slow, clear steps

beat rushing.

Show What You Learned

Student completes the core task or an accessible version

Student can explain at least one step, pattern, choice,

Teacher captures one proof item: screenshot, observation note, exit

Finish strong

Save it, share it, explain it, or demonstrate it.
