

# STEM Challenge Lesson or FLEX Day as needed

Plan. Code. Debug.

**Use code steps to  
make something  
happen on purpose.**

**1**

Plan it

**2**

Code it

**3**

Debug it

# Today's Mission

## Our focus

Use code steps to make something happen on purpose.

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

### Kindergarten

Use code steps to make something happen on purpose.

Keep the next step visible and keep trying.

# How We Will Move Through It

## What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

# If You Get Stuck

## Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Some groups need

support organizing  
materials and stick-

ing with one plan  
Explaining the design

can be harder than mak-  
ing it without sentence

Debugging is part  
of the learning.

## Show What You Learned

**Student completes the core task or an accessible version**

**Student can explain at least one step, pattern, choice,**

**Teacher captures one proof item: screenshot, observation note, exit**

Finish strong

Save it, share it, explain it, or demonstrate it.
