

You're An Engineer

Design. Build. Improve.

Design a solution, build it, and improve it.

1

Imagine it

2

Build it

3

Improve it

Today's Mission

Our focus

Design a solution, build it, and make it better.

- ▶ Student completes the core task or an accessible version
- ▶ Student can explain at least one step, pattern, choice,
- ▶ Teacher captures one proof item: screenshot, observation note, exit

Kindergarten

Design a solution, build it, and improve it.

Keep the next step visible and keep trying.

How We Will Move Through It

What to keep in front of you

- ▶ Model the first step before independent or partner work starts.
- ▶ Keep one visible checklist, anchor chart, or projected example available throughout
- ▶ Pause once mid-lesson for a quick debug, reflection, or reset point.

If You Get Stuck

Use this help ladder

1. Look at the slide.
2. Try one small step.
3. Ask your partner.
4. Ask one clear question.

Hidden assumptions in the directions can make support requests pile up
Without a visible success cue, students may not know when they

Testing helps us improve instead of guess.

Show What You Learned

Student completes the core task or an accessible version
