Lesson Focus

Vocabulary, visual communication, and classroom making through an interactive build.

Learning Targets

- Students connect a word or concept to a physical or visual representation.
- Students work with peers to assemble a simple shared product.
- Students explain what their piece represents.

Materials

- Word cards
- Maker materials
- Display space

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
