

AI for Oceans and Robotics

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Grade 2

Likely blocks: Day 1 · 10:45-11:35 · Callon; Day 1 · 2:15-3:05 · Henchen; Day 4 · 10:45-11:35 · Barthelman

Lesson Focus

Machine-learning ideas, sorting, and early robotics connections for Grade 2.

Learning Targets

- Students describe AI or machine-learning ideas in simple language.
- Students complete a guided digital classification or coding task.
- Students connect the activity to a real-world example.

Materials

- Student devices
- AI or coding platform
- Projected model

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
