

Robotics and Digital Book Project

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Grade 2

Likely blocks: Day 1 · 10:45-11:35 · Callon; Day 1 · 2:15-3:05 · Henchen; Day 4 · 10:45-11:35 · Barthelman

Lesson Focus

Sphero Indi robotics paired with Book Creator documentation or storytelling.

Learning Targets

- Students program a robot through a short guided task.
- Students capture or describe their learning in a digital book format.
- Students share one successful robot or storytelling choice.

Materials

- Robots
- Student devices
- Book Creator or equivalent tool

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.

Source Notes

This lesson packet is enriched with transcript-derived lesson notes, the school schedule roster, and official starting-point resources. See the paired Markdown guide for clickable links.
