

Block Coding with Sphero

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Grade 3

Likely blocks: Day 3 · 9:50-10:40 · Lamanaco; Day 4 · 9:50-10:40 · Lallucci; Day 5 · 9:50-10:40 · Regelsberger; Day 5 · 2:15-3:05 · Tandoi

Lesson Focus

Block-based robot programming with movement, aiming, loops, and safety expectations.

Learning Targets

- Students connect to the correct robot and identify its controls.
- Students create a short movement program using a loop.
- Students follow equipment and partner expectations.

Materials

- Sphero robots
- Student devices
- Floor path or challenge space

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
