

Event-Driven Robot Coding

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Grade 4

Likely blocks: Day 1 · 1:15-2:10 · Baris; Day 2 · 1:15-2:10 · Fowler; Day 3 · 1:15-2:10 · Schrank;
Day 4 · 1:15-2:10 · Autore

Lesson Focus

Robotics with events, sensors, reactions, and challenge-based troubleshooting.

Learning Targets

- Students build an event-driven or sensor-based program.
- Students test and revise code based on robot behavior.
- Students explain the trigger and response in their program.

Materials

- Robots
- Student devices
- Challenge setup or obstacle space

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
