

# Minecraft Coding Fundamentals

Piter Garcia

March 20, 2026

## Grade and Class Match

**Grade:** Grade 4

**Likely blocks:** Day 1 · 1:15-2:10 · Baris; Day 2 · 1:15-2:10 · Fowler; Day 3 · 1:15-2:10 · Schrank;  
Day 4 · 1:15-2:10 · Autore

## Lesson Focus

Minecraft Education setup, agent coding, challenge progression, and debugging.

## Learning Targets

- Students enter the correct Minecraft coding world and follow setup steps.
- Students use agent commands to solve a coding challenge.
- Students debug a failed attempt and explain the fix.

## Materials

- Student devices
- Minecraft Education
- Projected modeling screen

## Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
