

Tinkercad Design and Revision

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Grade 5

Likely blocks: Day 2 · 10:45-11:35 · Pickett; Day 3 · 10:45-11:35 · McGlashon; Day 5 · 10:45-11:35 · Pecora

Lesson Focus

3D design through shape placement, grouping, subtraction, and revision language.

Learning Targets

- Students navigate the Tinkercad workspace confidently.
- Students use grouping and hole tools to modify a design.
- Students explain one revision they made and why.

Materials

- Student devices
- Tinkercad accounts
- Projected example model

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
