

Intro Typing and Simple Circuits

Piter Garcia

March 20, 2026

Grade and Class Match

Grade: Kindergarten

Likely blocks: Day 1 · 12:25-1:15 · Justinger; Day 2 · 12:25-1:15 · Kesys; Day 4 · 12:25-1:15 · Pum

Lesson Focus

Short keyboarding practice paired with an early introduction to circuits and safe materials handling.

Learning Targets

- Students practice simple keyboard or touch-entry routines.
- Students identify a battery, light, or connection in a circuit demonstration.
- Students follow material expectations safely in a guided activity.

Materials

- Student devices
- Typing practice activity
- Circuit demo materials

Suggested Lesson Flow

1. Open with the exact device, tool, or routine students need in order to start successfully.
2. Model one example task before students begin independent or partner work.
3. Give students time to build, code, design, or document their work while circulating for support.
4. Close with a short share-out, reflection, or debugging discussion.
