

What your presentation shows

One assigned marketing function

1

PURPOSE

What does this function do for a business?

2

MARKETING CONCEPT

How does it connect a customer need or want with business goals and profit?

3

EXAMPLE

What would a business actually do?

A 3 is the target

4

Exceeds

Deeper connection or a new situation

3

Proficient

Accurate purpose, concept link, and specific example

More slides or decoration alone do not make a 4.

If the evidence is still growing

2 **Developing**

Part of the explanation is accurate, but a required link or example needs work.

1 **Initial**

You have started, but the required understanding is not clear yet.

Feedback tells you what to strengthen next.

What a proficient answer sounds like

Channel Management: grocery pickup

PURPOSE The store decides how customers receive groceries.

CONCEPT Pickup can serve a customer's want for convenience while supporting sales and profit.

EXAMPLE A customer orders online; a worker brings groceries to a pickup spot.

Where can you hear the purpose, concept link, and action?

Supports help you show what you know

You may use notes, cue cards, a vocabulary bank, rehearsal, or a meaningful visual.

The learning target stays the same:

Explain the purpose. Connect it to the marketing concept. Give a specific example.

Clear explanation matters; accent, eye contact, and decoration are not the target.
