

Monday • September 21, 2026

Entry slides 1–3, OR 16–18 if pp. 7–9 are owed

Chapter alternative: 13–14 (15 only if reached); catch-up 10–12 as needed
pp. 10–11; catch-up pp. 7–9 | SBTE 9; catch-up 7–8

BEFORE CLASS Confirm the section's page/heading. Keep this fictional. The Sep. 17 announcements mention a school merchandise store and a freshman survey, but this is not an actual offer or event. If Friday reading is incomplete, use the Monday catch-up route at the END of this deck instead. Do not run both openers.

0–2 MIN — SET UP “Open our recorded page and heading.” SBTE takes attendance and checks the route. Use main OR catch-up opener, never both.

2–5 MIN — OPENER What should the shop do FIRST?
A Pick our favorite; B Ask likely buyers; C Order a huge batch

CLOCK 20s look • 40s choose • 50s check • 50s connect • 20s buffer. Point, fingers, write, or quietly explain. Read the task aloud. Static slide cues require your timer.

KEY B. Research customer wants and needs before committing to a product. Ask about fit, comfort, use, or style rather than personal income.

ASK AT MOST ONE What could the shop ask about the hoodie?
How could that answer change what it sells?

HARD STOP “We have our choice. Hold the extra examples; the reading gives us the model.”

CLOSER “Customer evidence helps a business choose.”

TRANSITION “Our hoodie choice gives us a reason to read page 10: how does the marketing concept guide the decision?”

5–13 Selected notes screens. **13–27** Required reading, all assigned paragraphs. **27–36** Terms to Know, using the actual Teams file.

SBTE runs one 4-minute catch-up check during work, then rejoins. Keep source examples and academic expectations.

36–40 — MATCHED CHECK What must a business understand before deciding what to offer?

Key: Customer wants and needs, together with company goals and profits.

40–42 — RECORD THE STOP Block: ____ SBTE slide: ____

Printed page + heading/paragraph: _____

Next assignment item: _____ Next lesson begins: _____

Tuesday • September 22, 2026

Entry slides 4–6

Chapter alternative: 16–20

pp. 11–12 | SBTE 10

BEFORE CLASS Confirm the section’s page/heading. Preview through an everyday problem, then reveal the term. Do not quiz students on untaught P labels. Fictional delivery; no real school shipping promise. Terms to Know deadline is 9 AM today, not necessarily before this section meets.

0–2 MIN — SET UP “Open our recorded page and heading.” SBTE takes attendance and checks the route.

2–5 MIN — OPENER Which change fixes the problem?

A Change its design; B Ask about colors; C Fix pickup and delivery

CLOCK 20s look • 40s choose • 50s check • 50s connect • 20s buffer. Point, fingers, write, or quietly explain. Read the task aloud. Static slide cues require your timer.

KEY C. The missed event is a delivery/distribution problem. A better ad or new color would not fix the stated problem.

ASK AT MOST ONE Could a great product still disappoint a customer? How?
Which detail tells you delivery is the issue?

HARD STOP “Lock in your choice. Let’s name the concept and go to the reading.”

CLOSER “A product has to reach its customer at the right time.”

TRANSITION “Keep that late hoodie in mind. Pages 11–12 explain all four decisions in the marketing mix.”

5–13 Selected notes screens. **13–27** Required reading, all assigned paragraphs. **27–36** Terms to Know due 9 AM; Chapter #1 Review work.

SBTE runs one 4-minute catch-up check during work, then rejoins. Keep source examples and academic expectations.

36–40 — MATCHED CHECK A hoodie is advertised well but arrives too late. Which P needs attention, and why?

Key: Place; distribution did not deliver it when needed.

40–42 — RECORD THE STOP Block: ____ SBTE slide: ____

Printed page + heading/paragraph: _____

Next assignment item: _____ Next lesson begins: _____

Wednesday • September 23, 2026

Entry slides 7–9

Chapter alternative: 21–28, only through the actual reading stop
pp. 13–15 | SBTE 11–13

BEFORE CLASS Confirm the section's page/heading. The Sep. 17 announcements mention esports, which supplies school context. This invented event is not a claim about school plans. No need to be a gamer. Apply the routine only once this section reaches marketing functions. Review deadline is 9 AM today.

0–2 MIN — SET UP “Open our recorded page and heading.” SBTE takes attendance and checks the route.

2–5 MIN — OPENER Which question gives the most useful evidence?

A “Gaming is great, right?”; B “Play, watch, or neither?”; C “My favorite game wins?”

CLOCK 20s look • 40s choose • 50s check • 50s connect • 20s buffer. Point, fingers, write, or quietly explain. Read the task aloud. Static slide cues require your timer.

KEY B. It permits several preferences rather than assuming everyone likes gaming. Responses are fictional, not collected personal data. MIM includes qualitative and quantitative evidence.

ASK AT MOST ONE Why is “neither” a useful option?

How could the answer change the event?

HARD STOP “One useful question is enough. Now find the academic name in the text.”

CLOSER “Useful questions leave room for honest answers.”

TRANSITION “Page 13 names this work marketing information management; then we will read how all seven functions work together.”

5–13 Selected notes screens. **13–27** Required reading, all assigned paragraphs. **27–36** Chapter #1 Review due 9 AM; record unread content.

SBTE runs one 4-minute catch-up check during work, then rejoins. Keep source examples and academic expectations.

36–40 — MATCHED CHECK Which function gathers evidence about what customers want?

Key: Marketing information management, also called market research.

40–42 — RECORD THE STOP Block: ____ SBTE slide: ____

Printed page + heading/paragraph: _____

Next assignment item: _____ Next lesson begins: _____

Thursday • September 24, 2026

Entry slides 10–12

Chapter alternative: Unfinished 21–28; then 29

pp. 13–15 and Figure 1.4 | SBTE 11–14

BEFORE CLASS Confirm the section's page/heading. If the section has not read the functions, use the plain-language choices A change the hoodie, B ask preferences, C fix pickup. Reveal channel management as a preview and finish the reading before independent application.

0–2 MIN — SET UP “Open our recorded page and heading.” SBTE takes attendance and checks the route.

2–5 MIN — OPENER Which function should repair this first?

A Product/service management; B Marketing information management; C Channel management

CLOCK 20s look • 40s choose • 50s check • 50s connect • 20s buffer. Point, fingers, write, or quietly explain. Read the task aloud. Static slide cues require your timer.

KEY C for the immediate distribution problem. MIM can reveal preferred pickup times and other functions support the repair; accept this distinction rather than claiming mutually exclusive categories.

ASK AT MOST ONE How could research help choose a better pickup time?

Why wouldn't a louder advertisement fix this alone?

HARD STOP “We've identified the immediate repair. Save the other fixes for our application.”

CLOSER “Customer access is part of the product's success.”

TRANSITION “Page 13 explains the distribution decisions; Figure 1.4 shows how they support customer needs.”

5–13 Selected notes screens. **13–27** Required reading, all assigned paragraphs. **27–36** Finish source work; repair assigned Review responses.

SBTE runs one 4-minute catch-up check during work, then rejoins. Keep source examples and academic expectations.

36–40 — MATCHED CHECK How do channel management and place connect?

Key: Channel management coordinates distribution; place is that path within the marketing mix.

40–42 — RECORD THE STOP Block: ____ SBTE slide: ____

Printed page + heading/paragraph: _____

Next assignment item: _____ Next lesson begins: _____

Friday • September 25, 2026

Entry slides 13–15 for review; 13 alone or omit for assessment

Chapter alternative: 29 or selected misconception screen for review only

p. 4 retrieval; cumulative Chapter 1 | SBTE 4, 9–14

BEFORE CLASS Confirm the section's page/heading. Confirm the Sep. 25 assessment before use. If the SBTE needs a secure assessment start, omit the answer/reveal and follow-up entirely; do not coach assessed answers. Use the full routine on a review day. No new reading required before a test.

0–2 MIN — SET UP “Open our recorded page and heading.” SBTE takes attendance and checks the route.

2–5 MIN — OPENER Match G = good, S = service, I = idea.

1 Food to buy; 2 A paid bicycle repair; 3 “Recycle in our community”

CLOCK 20s look • 40s choose • 50s check • 50s connect • 20s buffer. Point, fingers, write, or quietly explain. Read the task aloud. Static slide cues require your timer.

KEY Food is a good, paid repair is a service, the recycling message is an idea. The printed poster is also a good; we are classifying the message, not its paper.

ASK AT MOST ONE If we classify the poster's MESSAGE, what is it?

Which P or function could help the repair stall?

HARD STOP “Pens down. Keep your response; we're moving to today's directions.”

CLOSER “Every offering needs an audience.”

TRANSITION “These are the same Chapter 1 distinctions we will use in today's review or assessment.”

5–8 Actual directions and allowed resources. **8–36** Confirmed assessment OR source-based review. If assessing, do not show the reveal or coach answers; follow approved accommodations.

36–40 — MATCHED CHECK Give a correct offering category and one linked P or function.

Key: For example: bike repair is a service; promotion communicates it, pricing sets its charge, and selling helps match it to a customer.

40–42 — RECORD THE STOP Block: ____ SBTE slide: ____

Printed page + heading/paragraph: _____

Next assignment item: _____ Next lesson begins: _____
