

Lesson 2: Build Step by Step

Use your guide. Build one part at a time.

**AI helps us build.
We stay in charge.**

Today's Mission

By the end of Lesson 2, I will have:

- ▶ my topic and guide recovered or confirmed
- ▶ 2 to 3 built sections or slides
- ▶ a project that still fits my CS goal
- ▶ a clear next step for Lesson 3

Topic + Guide

Build

Check

Quick Re-Entry

Before you start building, check 4 things

1. My topic is:
2. My project type is:
3. My guide has 3 to 5 parts:
4. My topic still connects to computer science:

If you are missing one of these

Use the AI Assistant with teacher help to recover it quickly, then start building.

Our AI Rules

- ▶ Do not type names or private information.
- ▶ AI is a helper, not the boss.
- ▶ AI can be wrong.
- ▶ We choose what to keep or change.
- ▶ The teacher can see class AI work.

Keep school rules
in the chat.

Read the answer.
Think. Then decide.

Never paste everything
without checking.

Today's Tools

AI Assistant

- ▶ Recover a guide if needed
- ▶ Clarify one part
- ▶ Turn one part into notes
- ▶ Check your section

Project Tool

- ▶ Build your slideshow
- ▶ One section at a time
- ▶ Use your guide
- ▶ Save your work

AI Assistant first if stuck. Project tool for the real work.

Our Workflow

Remember

Build first. Decorate later.

AI Assistant Prompt Cards

Use the AI Assistant to build from your guide

- ▶ My topic is _____. Part 1 of my guide is _____. Give me 3 to 5 notes or bullet points I can use on one slide.
- ▶ My topic is _____. Here is my draft section: _____. Does it match my guide and my computer science goal?
- ▶ My topic is _____. Help me explain this part in clear Grade 4 language: _____.
- ▶ My topic is _____. What details are missing from this part of my project: _____?

Use one prompt at a time, then build the real section yourself.

Worked Example

Topic and Guide

- ▶ Topic: How robots help animals
- ▶ Part 1: What robots are
- ▶ Part 2: Ways robots help animals
- ▶ Part 3: Why this matters

One Real Slide

- ▶ Slide title: Ways robots help animals
- ▶ Bullet 1: Robots can help scientists watch animals safely.
- ▶ Bullet 2: Robots can help rescue or care for animals.
- ▶ Bullet 3: Robots use code and sensors to do jobs.

What happened here?

The guide turned into one real section. That is the goal for today.

What Not To Do

Do

- ▶ use your guide first
- ▶ build one section at a time
- ▶ ask AI for help with one part
- ▶ check if it still fits your topic

Do Not

- ▶ start decorating before building
- ▶ paste the whole AI answer
- ▶ skip your guide
- ▶ forget the CS connection

Midpoint Checklist

- ▶ I have my topic and guide.
- ▶ I built Part 1.
- ▶ I built Part 2.
- ▶ I am working on Part 3.
- ▶ My project still matches my computer science goal.
- ▶ I know what I still need to do next.

If you are stuck

Guide first. One small step. Partner. One AI prompt. Then teacher.

Ready for Lesson 3?

Before you leave, make sure you can say:

- ▶ What topic are you building?
- ▶ Which sections did you finish today?
- ▶ How did AI help without taking over?
- ▶ What still needs work before Lesson 3?

Save your work. Be ready to revise and finish next time.
