

Lesson 1: Find a CS Business Idea

Use Idea Generator to turn interests into business ideas.

Today's Mission

By the end, I will have:

- ▶ one business idea
- ▶ one customer or user
- ▶ one problem the business solves
- ▶ one computer science connection
- ▶ one prompt to use in Lesson 2

We are building a business model, not just picking a topic.

What Is a Business Model?

A business model explains

- ▶ who you help
- ▶ what problem you solve
- ▶ what you offer
- ▶ why people would want it

Our extra rule

Your idea must connect to computer science.

Apps, data, algorithms, websites, games, robots, privacy, accessibility, or automation can all count.

Computer Science Connection Menu

- ▶ app or website
- ▶ game or simulation
- ▶ data tool
- ▶ algorithm or automation
- ▶ robot, sensor, or 3D design
- ▶ privacy or cybersecurity
- ▶ accessibility technology
- ▶ digital communication

If you cannot explain the CS connection, the idea is not ready yet.

Use Idea Generator First

Idea Generator helps you

- ▶ answer questions about your interests
- ▶ find a customer or user
- ▶ turn an interest into a business idea
- ▶ make sure the idea connects to CS
- ▶ get a prompt for AI Assistant

Today, Idea Generator is the main tool.

Prompt Cards: Idea Generator

Click Copy, then paste into Idea Generator

- ▶ **Copy** My interests are ____ and _____. Ask me 3 questions, then give me 4 CS-connected business ideas.
- ▶ **Copy** I care about _____. What business could I create that uses computer science to help people?
- ▶ **Copy** I want to help _____. Give me 4 business ideas that use technology, data, apps, games, or automation.

Pick one idea that feels useful, realistic, and school-appropriate.

Worked Example

Interest

I like recess and sports.

Possible business

RecessBuddy: an app that helps students choose fair teams and game options.

CS connection

It uses a simple algorithm to balance teams and suggest games.

Choose One Idea

Your idea is ready when you can say:

- ▶ My business is called _____.
- ▶ It helps _____.
- ▶ The problem is _____.
- ▶ It uses computer science by _____.

If one part is missing, ask Idea Generator to help you fix it.

What Not To Do

Do

- ▶ answer the AI questions
- ▶ compare ideas
- ▶ choose one you understand
- ▶ check the CS connection

Do Not

- ▶ share private information
- ▶ pick an idea just because AI said it
- ▶ choose something too huge
- ▶ skip the CS connection

Exit Ticket

Before you leave, write:

- ▶ My business idea is _____.
- ▶ My customer is _____.
- ▶ The problem is _____.
- ▶ My CS connection is _____.
- ▶ The prompt I will use next is _____.
