

Block Coding with Bees (Intro. Block Coding Loops)

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Grade 2
- Workbook sessions: Session 22
- Class blocks: Day 1 10:45-11:35 Callon, Day 1 2:15-3:05 Hennen, Day 4 10:45-11:35 Barthelman
- Reference file: block-coding-with-bees-intro-block-coding-and-loops.bib

School Planning Goals and Inclusion

- What is expected: I can decompose a problem into smaller steps, in multiple ways | | I can identify the essential information needed to get the Bee to the hive. | | I can code using fixed and changing pieces of information. | | I can document my plan to get the bee to the hive using block-coding
- What we achieved: No direct transcript match is attached yet. Treat this lesson as workbook-backed and enrich it when a matching classroom transcript is available.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
