

Tech Troubleshooting: | Digital Literacy and System Design

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Grade 2
- Workbook sessions: Session 6
- Class blocks: Day 1 10:45-11:35 Callon, Day 1 2:15-3:05 Hennen, Day 4 10:45-11:35 Barthelman
- Reference file: tech-troubleshooting-digital-literacy-and-system-design.bib

School Planning Goals and Inclusion

- What is expected: I can tell the difference between hardware and software. | | I can explain how software is used in computing systems.
- What we achieved: No direct transcript match is attached yet. Treat this lesson as workbook-backed and enrich it when a matching classroom transcript is available.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
