

What is Coding?

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Grade 2
- Workbook sessions: Session 21
- Class blocks: Day 1 10:45-11:35 Callon, Day 1 2:15-3:05 Hennen, Day 4 10:45-11:35 Barthelman
- Reference file: what-is-coding.bib

School Planning Goals and Inclusion

- What is expected: I can create two or more algorithms for the same task. | | I can identify and debug errors within an algorithm or program that include sequencing. | | I can develop and document a plan that outlines specific steps taken to complete a project.
- What we achieved: No direct transcript match is attached yet. Treat this lesson as workbook-backed and enrich it when a matching classroom transcript is available.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
