School Planning Goals and Inclusion

- What is expected: - I can understand the concept of AI as a thought partner. | - I can explore creative uses of AI in brainstorming and problem-solving. | - I can develop critical thinking skills and evaluate AI-generated output. | - I can describe ways I will use AI as a tool for learning.
- What we achieved: No direct transcript match is attached yet. Treat this lesson as workbook-backed and enrich it when a matching classroom transcript is available.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
