

Brainflakes Challenge

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Grade 4
- Workbook sessions: Session 1
- Class blocks: Day 1 1:15-2:10 Baris, Day 2 1:15-2:10 Fowler, Day 3 1:15-2:10 Schrank, Day 4 1:15-2:10 Autore
- Reference file: brainflakes-challenge.bib

School Planning Goals and Inclusion

- What is expected: -I can share information and collaboratively build a structure that represents my group's shared and unique qualities. | -I can demonstrate teamwork and problem-solving skills during a building challenge. | -I can apply computational thinking concepts such as decomposition and abstraction to design my Brain Flakes structure 4-6.CT.8 .4-6.CT.10). | -I can develop an iterative design process to meet specific criteria and constraints articulate the steps in the design process. (4-6.CT.10).
- What we achieved: This lesson points to local transcript or evidence files in the workspace so the packet can be revised from what actually happened in class.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
