School Planning Goals and Inclusion

- What is expected: - I can design and build a contraption that will meet the requirements of the assignment and fit in the required work area. | - I can rethink my ideas to improve my design | - I can describe the steps taken and choices made to design and develop a solution using the design process. (4-6.CT.10)
- What we achieved: This lesson points to local transcript or evidence files in the workspace so the packet can be revised from what actually happened in class.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
