

Coding with code.org | (Course A) | Learning to Drag Drop

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Kindergarten
- Workbook sessions: Session 20
- Class blocks: Day 1 12:25-1:15 Justinger, Day 2 12:25-1:15 Kesys, Day 4 12:25-1:15 Pum
- Reference file: coding-with-code-org-course-a-learning-to-drag-and-drop.bib

School Planning Goals and Inclusion

- What is expected: K-1.IC.2: I can explain classroom chromebook expectations | K-1.CT.4: I can decompose a task into smaller steps | K-1.CT.9: I can fix (debug) mistakes in an algorithm | K-1.CT.10: I can create a plan (algorithm) that shows steps to complete a task.
- What we achieved: No direct transcript match is attached yet. Treat this lesson as workbook-backed and enrich it when a matching classroom transcript is available.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
