

Chapter 2 • Marketing Plan

Teacher guide v2 | Chapter 1-style Chapter 2 baseline | 4 October 2026

Purpose: transfer the documented Chapter 1 teaching process while the Chapter 2 textbook controls content. This is a planning baseline for independent review—not the later Warner/UofR-informed redesign and not a posted classroom assignment.

What Chapter 1 actually established

Evidence state	Transferable practice / limit
Co-planned and observed	Start with visible agenda/materials and attendance. Resume each block at its actual last stopping point.
Co-planned; later adjusted	Use a brief, content-related opener when it serves the reading. Generally about 3–5 minutes; an early-block arrival bridge could take about 5–8. Productive discussion may run longer, but carry unfinished core work forward.
Observed	Use a small notes/discussion chunk and the matching textbook passage. Notes usually came first, but reading-first also occurred; the order is not fixed.
SBTE direction	Students read, locate evidence, and reason. A visual or prompt may connect ideas but must not tell students the reading answer or complete an application for them.
Co-planned and observed	Model the first digital Terms to Know card. Students build term + accurate definition + meaningful picture incrementally, in order of textbook encounter. The picture must not simply reveal the term.
Observed	Connect Test Your Knowledge/review work to pages actually read. Allow class time for notes, Terms and review; the order can flex.
Chapter 1 specific	Its quiz, bonus, creative-design task, Listen and Speak presentation, rubric, and shifted test schedule do not become Chapter 2 requirements.

Pacing rule: the nine segments below are a source sequence, not nine guaranteed days. Use the actual bell window. A segment may continue next meeting; two short segments may combine. Block 1 and Block 5 retain independent stops.

Before teaching: confirm the Chapter 2 PDF is available to students, the SBTE's notes (if any), the Terms format/template, and any actual Teams review assignment. Local Chapter 2 textbook access is confirmed; current school posting and dates are not.

Segment 1 • Why make a marketing plan?

SOURCE Printed pp. 17–18 • chapter opening and “Creating a Marketing Plan”

INTENDED LEARNING Explain what a marketing plan guides and why planning precedes action.

Instructional function	Teacher move and student evidence
Start / retrieval	Recall Chapter 1 marketing planning as a function, but let students distinguish a full marketing plan after reading. Ask: “A business has a new product. What decisions would it need to make before a campaign?” Collect reasons; do not supply the textbook definition yet.
Notes / focus	If authorized notes exist, work only the matching introductory prompts. Otherwise identify the chapter title and objectives as a reading focus.
Read and discuss	Read p. 18 in order. Pause after the first two paragraphs: what is planned, and why before acting? Continue to the example and measurable steps.
Terms / review / work	After reading, introduce marketing plan as the first key term. Model the first digital card if the format is confirmed; otherwise rehearse the term orally. Use only review work aligned to p. 18.
Quick check after thinking	Ask students to point to one decision a plan informs and one way the business could later judge progress.
Actual stop / restart	Record exact p. 18 paragraph, notes prompt, model-card status, and any unfinished review.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 2 • Plan elements and outside conditions

SOURCE Printed pp. 19–20 • elements, environmental analysis, Figure 2.1

INTENDED LEARNING Distinguish business-controlled choices from outside conditions and use PEST to organize external influences.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve how the p. 18 plan acts as a roadmap. Compare one business-controlled choice with one outside condition; ask which the business can directly change before naming categories.
Notes / focus	Use only matching plan-section/internal–external prompts, if notes are supplied. Do not pre-label Figure 2.1 examples.
Read and discuss	Read p. 19 from title/table of contents through environmental analysis; continue p. 20 through Figure 2.1. Have students locate one outside influence in the figure.
Terms / review / work	After the figure, add PEST analysis as the next Terms card if assigned. Use a short classification with student evidence; complete only matching review items.
Quick check after thinking	Ask whether a business posting schedule and a technological change are controlled in the same way; require a reason from the page.
Actual stop / restart	Record whether Figure 2.1 was reached and the PEST card/review state. Resume before “Marketing Strategy” if not read.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 3 • Goals and SMART

SOURCE Printed p. 20 “Marketing Strategy” onward and p. 21 Figure 2.2

INTENDED LEARNING Explain why a goal needs a concrete, checkable result and identify this textbook’s SMART components.

Instructional function	Teacher move and student evidence
Start / retrieval	Connect external scan and market research to realistic goals. Show a vague business goal and ask what would make it checkable; collect student revisions before the chapter figure.
Notes / focus	Use matching goal/strategy prompts only. Keep the acronym blank until students inspect the source.
Read and discuss	Read the remainder of p. 20 and p. 21, including Figure 2.2. Compare the book’s weak and stronger examples.
Terms / review / work	After reading, add SMART goal in Terms order if assigned. The controlling wording is Specific, Measurable, Achievable, Results-focused, Time-bound. Revise one vague goal with a measurable result and time.
Quick check after thinking	Ask students what evidence and date would let a business decide whether a goal was met.
Actual stop / restart	Record whether the strategy section, Figure 2.2, and a student revision were reached.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 4 • Milestones and market research

SOURCE Printed pp. 22–23 • four milestone steps; Market Research and Target Market

INTENDED LEARNING Use milestones to monitor a goal and connect customer research to target-market choice.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve the SMART goal students actually revised. Ask what smaller step might precede that goal; collect one reason before giving the chapter's milestone sequence.
Notes / focus	Use matching milestone/research notes only. The four steps cross the p. 22–23 page break; do not assume one page completes the idea.
Read and discuss	Read p. 22 steps 1–3 and continue p. 23 step 4, Market Research, and Target Market. Pause to ask what data would trigger a plan adjustment.
Terms / review / work	Students outline a goal, two milestones, and one way to monitor progress; then connect a customer-data question to target-market evidence. This is an ungraded in-class check, not a new assigned project.
Quick check after thinking	Ask which evidence would show a milestone is complete and what a marketer does if it is not.
Actual stop / restart	Record the exact milestone step and p. 23 heading reached; carry forward the rest.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 5 • Customer profile and competition

SOURCE Printed p. 24 • Customer Profile; Competitive Analysis

INTENDED LEARNING Distinguish a target market from a typical-customer profile and identify what competitor analysis examines.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve the p. 23 target-market definition from student reading. Ask what facts about likely customers and competitors would help a marketer make a choice.
Notes / focus	Use matching profile/competition prompts if available; avoid using students' personal details as example data.
Read and discuss	Read p. 24. Ask students to identify one detail about likely customers and one question about a competitor.
Terms / review / work	After reading, add customer profile as the next Terms card if assigned. Use a fictional case for a brief distinction; answer only matching review items.
Quick check after thinking	Ask: "Is a target market a group or a report about a typical member? What does the page say?"
Actual stop / restart	Record exact p. 24 heading, profile-card state, and review work.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 6 • Positioning, mix, execution and budget

SOURCE Printed p. 25 • Marketing Mix and Positioning; Execution Plan; Budget

INTENDED LEARNING Explain how the four Ps support a position and how execution/budget make a plan actionable.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve the four Ps studied in Chapter 1; do not assume the earlier group activity's product examples are assigned again. Ask which marketing decisions must fit a business's promise to its intended customers; let students propose before the textbook example.
Notes / focus	Use matching positioning/execution prompts, if authorized. Keep four-P retrieval distinct from the new p. 25 planning ideas.
Read and discuss	Read all p. 25. After students identify the source's position example, ask how product and price support it; continue to execution and budget.
Terms / review / work	In discussion, students connect a product choice, a target customer, one planned action, and a budget consideration. This is a source check, not an official new marketing-mix project.
Quick check after thinking	Ask what an execution plan adds after a strategy has been chosen and why a budget matters.
Actual stop / restart	Record whether positioning, execution, and budget were all read; do not rush the final section.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 7 • Metrics, appendix, and the chapter case

SOURCE Printed p. 26 • Metrics; Appendix; “Market This”

INTENDED LEARNING Choose a measure linked to a stated goal and distinguish supporting information from source references.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve the goal and budget discussion from p. 25. Ask which result would actually show whether a stated customer-growth goal was met. Do not give the metric yet.
Notes / focus	Use matching measurement/documentation prompts if available.
Read and discuss	Read p. 26 through Metrics and Appendix. Then read the engineering-firm “Market This” scenario and let students identify what they still need to know.
Terms / review / work	After reading, add metrics and bibliography as the final two Terms cards if assigned. Use the case as an ungraded question unless a graded application is chosen.
Quick check after thinking	Ask students to pair one goal with a relevant metric and identify what source material belongs in a bibliography.
Actual stop / restart	Record whether the case was read and the two cards/review responses were finished.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 8 • Review the chapter from the source

SOURCE Printed p. 27 • Chapter Review; refer back to pp. 18–26

INTENDED LEARNING Explain the chapter's six terms and use the reading to support answers.

Instructional function	Teacher move and student evidence
Start / retrieval	Retrieve the plan route: context → goal → customer evidence → positioning/action → measure. Use short unlabeled cues for the six terms; collect responses before displaying the labels.
Notes / focus	Revisit only gaps shown by student work. Do not replace source reading with an answer sheet.
Read and discuss	Read the p. 27 review directions/categories. Direct students back to the relevant page or figure for each response.
Terms / review / work	If Chapter 2 Terms/review are actually assigned, provide completion time. Otherwise use in-class matching and source-supported explanation. P. 27 does not print a separate Test Your Knowledge worksheet's questions.
Quick check after thinking	Ask why a metric follows execution and where the text supports the answer.
Actual stop / restart	Record which cards, source pages, and actual assigned review items are unfinished; no quiz date is inferred.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Segment 9 • Application decision and source rehearsal

SOURCE Printed p. 26 “Market This” and p. 27 application options

INTENDED LEARNING Use Chapter 2 ideas in a source-connected situation while the SBTE decides the graded task.

Instructional function	Teacher move and student evidence
Start / retrieval	Review the actual unresolved questions from Session 8. Ask what part of a plan helps when conditions change. Accept more than one source-supported route.
Notes / focus	Name p. 27 options only: Read and Write, Listen and Speak, Build It. Do not announce one as assigned before confirmation.
Read and discuss	If an option has been selected, read its exact prompt. If not, return to the p. 26 engineering-firm case and relevant source pages.
Terms / review / work	Ungraded rehearsal: identify one internal and one external factor, a needed data source, and a possible measure—after students reread the case. If SBTE confirms an assignment, replace rehearsal with the authorized instructions and criteria.
Quick check after thinking	Ask students to justify which claim comes from the chapter and what information the case leaves unknown.
Actual stop / restart	Record whether an application was selected, its actual instructions/date/platform if confirmed, and separate Block 1/5 progress. Do not manufacture presentation or test plans.

RUNNING RULE Use a short opener and small notes chunk when useful; preserve source reading and student reasoning. The rows are functions to complete across the actual time available, not a promise that this segment finishes today.

BLOCK 1 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

BLOCK 5 Last page/heading: _____ Notes/Terms/review: _____ Next start: _____

Teacher checkpoints and decisions still open

Six Chapter 2 key terms, in encounter order

Term	Printed source / precise check
marketing plan	p. 18 · What decisions does the roadmap guide?
PEST analysis	p. 20 Figure 2.1 · Which outside condition is being scanned?
SMART goal	pp. 20–21 · Specific, Measurable, Achievable, Results-focused, Time-bound.
customer profile	p. 24 · What does the report describe about a typical customer?
metrics	p. 26 · What measure matches the goal?
bibliography	p. 26 · Which works were referred to in the plan?

Confirm; do not infer

School/Teams state: Chapter 2 posting, notes, digital-card template, separate review worksheet, submission route, and actual dates. Instructional decisions: vocabulary quiz, review deadline, graded application, presentation/project, rubric, and test timing. Chapter 1 precedents are evidence of a process, not authorization for a Chapter 2 grade or deadline.

Two-section live stop record

Block	Last printed page / heading	Notes · Terms · review stop	Next opening
1	_____	_____	_____
5	_____	_____	_____

Phase 2 improvement candidates — NOT part of this baseline

After independent review of this historical baseline, compare the actual Chapter 1 evidence and student work against Warner/UofR learning to decide what to improve. No new UDL, assessment, multimedia, or agency routine is implemented in v2.

Provenance: private 86-file manifest and claim-level evidence ledger in TeachingPlacement-Private-Records; public-safe academic content from the Chapter 2 Marketing Plan textbook, printed pp. 17–27. The v1 guide was audited session by session and preserved unchanged as a separate historical review artifact.
