

Interactive Word Wall Build

Piter Garcia

March 20, 2026

Packet Use

This printable lesson packet is generated from the paired Markdown guide. The Markdown version remains the clickable, neurodivergent-friendly working copy; this PDF carries the same lesson substance in a formal handout format. Evidence claims in this packet are based on transcript-derived lesson notes and the cleaned transcript files in this workspace.

Quick Scan

- **Grade:** Grade 1
- **Grade Hub:** Notes [`../grade-1-Notes.md`]
- **Schedule Reference:** `Spring2026_TeachingSchedule_Derek.md` [`../school/Spring2026_TeachingSchedule_I`]
- **Workbook Sheet:** 1st in `Teaching_Placement-IGNITE Curriculum_ GCSD25-26.xlsx`
- **Lesson Focus:** Students build an interactive vocabulary display that links words, visuals, and classroom-made media through QR or video-supported artifacts.
- **CS Alignment Strength:** CS-adjacent digital communication and information representation
- **LaTeX Source:** `interactive-word-wall-build.tex` [`./interactive-word-wall-build.tex`]
- **Bib File:** `interactive-word-wall-build.bib` [`./interactive-word-wall-build.bib`]
- **Artifacts Folder:** `artifacts/` [`./artifacts/`]

Lesson Identity

- **Likely Class Blocks:** Day 3 – 12:25-1:15 – Gargana, Day 3 – 2:15-3:05 – Polfleit, Day 5 – 12:25-1:15 – Montgomery
- **Main Lesson Family:** Interactive Word Wall Build
- **Primary Evidence Base:** Transcript-derived notes plus source transcripts from this teaching-placement workspace.
- **Primary External Source Type:** Official curriculum/provider materials.

What We Are Teaching

- representing information with text, image, and object together
- using a predictable build sequence to assemble a shared classroom artifact
- linking a vocabulary item to a digital or recorded explanation
- participating in collaborative classroom technology routines

CS Standards Alignment

- **1A-DA-06:** Collect and present the same data in various visual formats. Why it fits here: Students represent one idea across word cards, images, QR codes, and built pieces.
- **1A-AP-08:** Model daily processes by creating and following algorithms. Why it fits here: Students follow a repeatable sequence for selecting, building, and attaching their component.
- **1A-IC-17:** Work respectfully and responsibly with others when using shared technology. Why it fits here: The lesson depends on collaboration, turn-taking, and shared artifact care.

NYS / Local Curriculum Alignment

- Aligned to the local IGNITE first-grade sheet through literacy-tech integration and classroom digital creation.
- Supports New York-facing communication and media fluency by requiring students to connect a concept to a digital or scannable representation.
- This is a lighter-CS lesson, but it still counts as computing instruction because students organize information structures and use technology-supported representation intentionally.

Lesson Content and Concepts

- representation
- media linking
- sequence
- shared artifact
- information organization

Evidence / Proof of Instruction

- **Transcript-derived note:** 260211 Grade 1 Gargana Word Wall [[../transcript-derived-lessons/260211-grade-1-gargana-word-wall.md](#)] The lesson note captures the Google Vids / QR word wall setup as an instructional design choice, not a casual craft activity.

- **Transcript-derived note:** 260212 Grade 1 Gargana Lego Wall [../transcript-derived-lessons/260212-grade-1-gargana-lego-wall.md] The second note shows that the word wall idea persisted as a structured project across sessions.
- **Source transcript:** 260211 Grade 1 Gargana Word Wall [../transcripts/260211-grade-1-gargana-word-wall.md] The transcript mentions objectives, LEGO-linked word wall pieces, and teacher concern about giving students explicit directions and outcomes.
- **Likely student proof:** Built vocabulary pieces, QR-linked media, recorded explanations, and the finished wall display all serve as evidence of teaching and learning.

Assessment Evidence

- Student can explain what their piece represents.
- Student can match a word to a visual or recorded explanation.
- Student participates in the shared build without breaking the collaboration routine.

UDL and Inclusion Supports

Multiple Representation

- Pair every word with a picture, color cue, and concrete object.
- Use teacher-modeled examples before students create their own pieces.
- Keep instructions anchored to one visible exemplar at a time.

Multiple Action / Expression

- Allow drawing, speaking, pointing, or building as valid ways to show understanding.
- Use partner roles: builder, holder, explainer, scanner.
- Offer pre-cut or partially prepared materials for students who fatigue quickly.

Multiple Engagement

- Let students choose which word or concept they represent.
- Use scanning, recording, or showing as motivating interactive elements.
- Celebrate each added piece so the wall becomes a visible cumulative success marker.

How We Are Already Making It Inclusive

- Transcript evidence suggests the lesson already used strong teacher objectives and concrete artifact goals.
- The build format supports students who need movement and tactile entry points.
- Using multiple media forms already broadens access beyond text-only vocabulary work.

How to Improve Inclusion Next Time

- Add a one-page visual build checklist at each table.
- Provide bilingual vocabulary cards and recorded directions.
- Offer a no-QR fallback path where students can point to a recorded explanation instead of scanning independently.
- Save sample student pieces in **artifacts/** to strengthen proof of instruction.

Materials and Setup

- Word cards
- QR links or short recorded videos
- Maker materials / LEGO or build pieces
- Display space
- Student or teacher scanning device

Teacher Moves / Script / Routines

- Start with one finished example and reverse-engineer how it was made.
- Assign one clear role before materials are distributed.
- Pause the room to compare two strong representation choices.
- Close by having students explain how the wall helps another learner understand the word.

Common Errors and Debugging

- Students may focus on decoration instead of meaning.
- QR or video links may fail without a backup display plan.
- Shared materials can create conflict if roles are not explicit.

Extensions and Simplifications

- Extension: add a short student-recorded explanation to each entry.
- Simplification: limit each team to one word, one image, and one explanation.
- Extension: sort wall entries into categories and ask students to explain the pattern.

Related Local Materials

- No direct local lesson packet linked yet.

Artifacts Checklist

- Compiled lesson PDF in **artifacts/**
- At least one screenshot, student example, or setup photo
- One short assessment or observation record
- Updated standards/source bibliography once the **.bib** file is revised
- Any teacher reflection or revision notes after reteaching
