

Chapter 2 • Marketing Plan

Teacher-run lesson guide | Baseline sequence modeled on the Chapter 1 classes

Phase 1: Chapter 1-style Chapter 2 baseline for independent Viber review. Nine sessions are planning segments, not fixed dates or proof of completion. Chapter 2 Teams files, graded work, quiz, project, and test remain unconfirmed.

Use this guide

- Teach the same baseline route in both Marketing sections. Before each block, start at that block’s actual page/notes/work stop—not at the calendar day.
- The 42-minute clock is an illustrative planning rail, not an observed fixed Chapter 1 formula. Protect the actual reading/work stop and resume it in the next block.
- Each lesson gives the opening question, notes focus, printed textbook pages, exact teacher cue, student work, and a short answer check. Keep the student-facing answer hidden until students respond.
- This records the Chapter 1 approach as a control baseline. Warner/UofR-informed changes belong to a separate Phase 2 after independent review.

Chapter 1 instructional pattern and evidence state

State	Chapter 1 practice	Chapter 2 transfer
School	Attendance and agenda; open saved textbook, notes, Terms to Know, and Marketing folder. Late arrivals re-enter the current task.	Check each block’s actual stop and file access; do not claim Chapter 2 Teams materials are posted.
SBTE	Brief concrete opener; take a few responses, then stop. A 30-minute opener displaced reading; the SBTE set a roughly five-minute target.	Use one short plan decision, a reason, and a hard transition to the source.
Observed	Chapter notes/discussion and missing-word completion preceded matching textbook reading in the usual route.	Use the authorized Chapter 2 notes if supplied; otherwise use textbook headings as teacher prompts, not a fictional approved deck.
Observed	Read matching pages/figures and ask source-based questions. The class sometimes carried reading forward when discussion or group work took longer.	Read Chapter 2 in printed-page order; record the exact paragraph/figure reached.
SBTE	Model one PowerPoint Terms-to-Know card: term and image first, definition on reveal; students then build cards in book encounter order.	Reuse the Chapter 1 process with the six Chapter 2 terms only after the Chapter 2 task/template is confirmed.
School	Answer aligned review items while notes and reading are fresh; use later quiz, application, presentations, and test preparation only when selected/assigned.	Use p. 27 and teacher checks now; add assigned Chapter 2 work only after confirmation.

Source anchors Sep 14 SBTE pacing feedback 00:59:09–01:05:03; Sep 15 classroom files/notes/review 00:11:06–00:12:06 and 00:38:39–00:44:02; Sep 16 flashcard model 02:02:23–02:08:33; Sep 22 application/reading adjustment 00:06:14–00:07:59; Sep 24 quiz and vocabulary review 00:00:00–00:17:00; Sep 25 application/rubric decision 00:19:46–00:27:18; Sep 30 Chapter 2 planning 02:16:13–02:19:05.

Later Chapter 1 refinement: Piter’s group marketing-mix work and vocabulary review connected student examples to terms; the SBTE then selected the Chapter 1 application and 1–4 presentation rubric. These were Chapter 1 events, not Chapter 2 requirements. Block 1 and Block 5 varied in completion; use separate live stop records rather than assumed matching pages.

Preflight: prepare the same four working materials

Item	Do before teaching	Current status
Chapter 2 PDF	Use the authorized Chapter 2 PDF. Confirm Teams availability before directing students to download it into their Marketing folder.	Local source exists; Teams posting is not verified here.
Chapter 2 notes	Confirm the SBTE's Chapter 2 notes. If none are supplied, use chapter headings as prompts; do not imply a new notes deck is assigned.	No Chapter 2 notes file found locally.
Terms to Know	If assigned, reuse the Chapter 1 digital-card format with Chapter 2 terms in encounter order. Model the first card.	Chapter 2 template/assignment not verified.
Chapter Review	Use p. 27 review prompts for planning; verify any separate worksheet and Teams assignment before citing its item numbers or due date.	The textbook's p. 27 review categories are visible; a separate assigned worksheet is not verified.

Illustrative 42-minute route — adapt to the actual block

Clock	Teacher move	Student evidence
0–2	Display one-screen agenda; attendance; confirm actual stop and files.	Correct PDF/page and work file open.
2–5	Run 3-minute problem/choice; take up to three responses; reveal the term after reasoning.	Choose, point, write, or say an evidence-based reason.
5–13	Teach the few note prompts tied to today's pages. Keep a key word visible.	Fill notes; answer one retrieval question.
13–27	Read the printed pages/figure. Pause at a paragraph to ask "What changed/why?"	Follow in text; name evidence from the page.
27–36	If Chapter 2 Terms or review are approved, give work time and check a sample. Otherwise run the matching in-class term/review check.	Saved card or in-class term/review response.
36–40	Ask the matched check; invite a reason; correct one misconception.	Show understanding without a public score.
40–42	Save/check file; state next task; note exact page, heading, notes slide, and unfinished work.	Know where to resume.

If the opener or discussion runs long Stop the opener at the agreed point; retain the actual reading/work stop. Chapter 1 sometimes deferred reading for group application, then resumed later. Do not falsely mark a planned segment complete.

Terms in Chapter 2 encounter order marketing plan (p. 18) → PEST analysis (p. 20) → SMART goal (p. 20) → customer profile (p. 24) → metrics (p. 26) → bibliography (p. 26). The p. 17 key-term list is alphabetical; Chapter 1 cards followed reading order.

Session 1 • Why make a marketing plan?

Printed pp. 17–18 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Explain the nature and purpose of a marketing plan.

Connection / retrieval Chapter 1: marketing planning is one of the seven marketing functions; the marketing concept links customer wants and needs with business goals.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	A business has a new product and a budget. It must decide whom to reach, how to reach them, and how it will know the effort worked. What would a written plan help it decide? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Chapter title/objectives (p. 17); marketing plan as a roadmap and strategy to generate revenue; planning guides realistic choices and measurable steps (p. 18).	Fill/retrieve matching notes.
13–27	Read p. 18 from “Creating a Marketing Plan” through the end. Pause after the first two paragraphs: “What is being planned? Why before acting?”	Read and point to source evidence.
27–36	Model the Chapter 1-style marketing-plan card (term/image before definition reveal) if the Chapter 2 task is approved. Otherwise model the term orally; record any unfinished file work.	Saved work or exact unfinished item.
36–40	Prompt: Is the plan just an advertisement? Key: No. It guides decisions across marketing and how results will be evaluated.	Term/concept plus reason.
40–42	Save and state next task. Record whether the model card, p. 18 reading, and notes were actually completed.	Clear restart point.

Words to use at the transition “Give me one decision this business must make. Now read page 18 and find what the marketing plan does for that decision.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 2 • Plan elements and outside conditions

Printed pp. 19–20 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Distinguish internal decisions from external conditions; use PEST to scan the latter.

Connection / retrieval Retrieve yesterday’s plan purpose. Keep the same plan example rather than introducing a new unrelated unit.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	A shop can choose how often it posts online; it cannot choose the local unemployment rate. Which is inside the business’s control? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Plan sections: title/contents, executive summary (commonly written last), environmental analysis. Internal = controlled by the company; external = outside conditions. PEST = political, economic, social, technological (Figure 2.1).	Fill/retrieve matching notes.
13–27	Read p. 19 through environmental analysis, then p. 20 through Figure 2.1. Ask students to identify one outside factor from the figure, not to predict politics from personal opinion.	Read and point to source evidence.
27–36	If assigned, add the PEST card and aligned review. Otherwise classify one internal and one external condition using Figure 2.1.	Saved work or exact unfinished item.
36–40	Prompt: Is a company’s posting schedule a PEST factor? Key: No, it is internally controlled. A change in technology available to customers can be an external PEST factor.	Term/concept plus reason.
40–42	Save and state next task. Record whether Figure 2.1 and the PEST card were reached.	Clear restart point.

Words to use at the transition “Mark one thing the business can change and one it must respond to. Page 19 will help us name the difference.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 3 • Marketing goals that can be checked

Printed pp. 20–21 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Distinguish a vague wish from a SMART marketing goal.

Connection / retrieval PEST informs the plan; goals state what the plan is trying to achieve.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	Compare “get more customers” with “gain 20 new customers by June 1.” Which one could we check later, and what detail makes that possible? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Read the Marketing Strategy / Sales and Marketing Goals sections and Figure 2.2. In this textbook SMART means Specific, Measurable, Achievable, Results-focused, Time-bound.	Fill/retrieve matching notes.
13–27	Finish p. 20 after the PEST figure, then read p. 21 including “This is the SMART Way.” Ask what each weak-to-strong revision added.	Read and point to source evidence.
27–36	If assigned, add the SMART goal card. As guided practice, revise one vague goal using a measurable result and time limit; no new project is implied.	Saved work or exact unfinished item.
36–40	Prompt: Does “make our product popular” meet the textbook’s SMART test? Key: No; it lacks a clear measurable result and time boundary.	Term/concept plus reason.
40–42	Save and state next task. Record whether Figure 2.2 was discussed and each student attempted a revised goal.	Clear restart point.

Words to use at the transition “Do not just tell me which sounds better. Point to the part that lets us measure progress.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 4 • Milestones and evidence about customers

Printed pp. 22–23 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Break a goal into milestones and explain why market research informs the plan.

Connection / retrieval Retrieve one SMART goal from the prior lesson; ask what smaller steps would show progress.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	The goal is 20 new customers by June 1. What is one smaller step the business could complete before then? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Four textbook milestone moves across pp. 22–23: define/time; explain how; measure success; re-evaluate. Market research collects information; target market identifies likely buyers.	Fill/retrieve matching notes.
13–27	Read p. 22 and the continuation on p. 23 through “Market Research.” Pause at the four steps and ask what evidence would show a step is complete.	Read and point to source evidence.
27–36	Students write one goal → two milestones → one way to check progress. Continue the approved review where the question matches these pages; no new Terms card is required here.	Saved work or exact unfinished item.
36–40	Prompt: Is “post online someday” a checkable milestone? Key: No. It needs a specific action/time or measurable completion condition.	Term/concept plus reason.
40–42	Save and state next task. Record whether milestone step 4 and the market-research section were read.	Clear restart point.

Words to use at the transition “A milestone is not a second big goal. Show me a smaller achievement that helps us get there.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 5 • Customer profile and competition

Printed p. 24 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Explain what a customer profile summarizes and why competitor information matters.

Connection / retrieval Chapter 1 target market = the group a business wants to reach; p. 24 adds evidence about that group.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	Two customers want the same service but use it at different times. What information would help a business decide when to offer it? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Customer profile is a report portraying a typical customer/target market. Competitive analysis examines competitors’ strengths and weaknesses; avoid equating it with copying a competitor.	Fill/retrieve matching notes.
13–27	Read all of p. 24, including Customer Profile and Competitive Analysis. Ask which details are evidence about customers and which are evidence about another business.	Read and point to source evidence.
27–36	If assigned, add the customer-profile card. Use a fictional case to name two useful customer facts and one competitor question; avoid student personal data.	Saved work or exact unfinished item.
36–40	Prompt: What is the difference between a target market and a customer profile? Key: A target market is the group; the profile describes common characteristics of likely customers within it.	Term/concept plus reason.
40–42	Save and state next task. Record the exact paragraph and card completed.	Clear restart point.

Words to use at the transition “We are describing customer patterns relevant to the plan, not guessing about a classmate.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 6 • The 4 Ps become an execution plan

Printed p. 25 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Connect Chapter 1 marketing mix to Chapter 2 positioning, execution, and budget.

Connection / retrieval Quick retrieval: product, price, place, promotion. Do not substitute the seven functions for the four Ps.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	A store promises “style on a budget.” Which two of the four Ps must fit that promise? Let students name and justify them before reading. Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Marketing mix and positioning; execution plan puts the ideas into action; budget states funds available for marketing. Use the textbook’s Target example only after students make their prediction.	Fill/retrieve matching notes.
13–27	Read p. 25 in full. Pause at positioning: “What does this business want customers to associate with it?” Then read execution plan and budget.	Read and point to source evidence.
27–36	Use the previously practiced four-P structure to describe a fictional product in one sentence per P; add one action and a simple budget constraint. No new official key term card today.	Saved work or exact unfinished item.
36–40	Prompt: Can a low-price promise coexist with a price far above the intended customers’ budget? Key: Not without explanation; mix decisions must support positioning and business goals.	Term/concept plus reason.
40–42	Save and state next task. Record whether all p. 25 sections were covered; do not rush budget.	Clear restart point.

Words to use at the transition “You already built a marketing mix in Chapter 1. Today we are checking how those choices fit a plan, a position, and a budget.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 7 • Measure, document, and review the plan

Printed p. 26 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Identify a metric tied to a goal and the role of an appendix/bibliography.

Connection / retrieval Return to the Lesson 3 goal and Lesson 4 milestone; ask how success could be checked.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	A campaign gets many views but few new customers. Which result would tell us whether a “new customers” goal was met? Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Metrics are standards of measurement/KPIs; select what matters to the stated goal. Appendix holds supporting materials; bibliography lists works referred to in the plan.	Fill/retrieve matching notes.
13–27	Read p. 26 through Metrics, Appendix, and Market This. Use the engineering-firm scenario as a reading/application question, not an answer slide.	Read and point to source evidence.
27–36	If assigned, add metrics and bibliography cards. Match one goal to a metric and explain what the result shows.	Saved work or exact unfinished item.
36–40	Prompt: A goal is 20 new customers. Is “number of new customers” or “font size of the ad” the better metric? Key: New customers, because it measures the stated result.	Term/concept plus reason.
40–42	Save and state next task. Record whether p. 26 “Market This” was read and both cards were saved.	Clear restart point.

Words to use at the transition “The result we count must match the goal. Views can be useful, but they do not automatically mean new customers.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 8 • Chapter review and vocabulary check

Printed p. 27 + pp. 18–26 as needed | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Retrieve the six key terms and explain how the parts of the plan fit together.

Connection / retrieval Use Chapter 1’s review-before-test pattern, but do not announce an unconfirmed date or grade.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	Show six unlabelled prompts—roadmap, outside scan, checkable goal, likely-customer report, success measure, source list. Ask for the term before revealing it. Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Revisit p. 17 objectives and the p. 27 Define Key Terms / Test Your Knowledge sections. A plan has context, goal, customer evidence, mix/actions, budget, and measures.	Fill/retrieve matching notes.
13–27	Open p. 27. Let students locate one answer in pp. 18–26 and explain which page supports it. Do not fabricate the separate worksheet’s question numbers.	Read and point to source evidence.
27–36	If Chapter 2 cards/review are assigned, finish them. If the SBTE confirms a vocabulary quiz, use the approved quiz; otherwise practice term matching and explanation.	Saved work or exact unfinished item.
36–40	Prompt: Why is a metric needed after executing a plan? Key: To evaluate whether the plan met its stated goal and to inform changes.	Term/concept plus reason.
40–42	Save and state next task. Record incomplete cards/review items and any quiz decision actually confirmed.	Clear restart point.

Words to use at the transition “Use the chapter and your cards to find what you can explain, not just what you can recognize.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Session 9 • Chapter 2 application / presentation decision

Printed p. 27 | Suggested 42-minute block | Same route for Blocks 1 and 5; resume each class at its own actual stop.

Learning target Rehearse a textbook Chapter 2 application, or carry out the specific p. 27 task selected by the SBTE. This is not automatically graded.

Connection / retrieval Chapter 1 moved from reading/review to selected application and presentations before its test. Which Chapter 2 application, if any, is assigned remains a separate SBTE decision.

Run the lesson

Clock	Say / do	Student evidence
0–2	Agenda, attendance, source files; verify this class’s actual stop.	Correct page/work file open.
2–5	Ask: “Which part of a marketing plan would help a business most if a new competitor entered nearby?” Take two supported answers; do not reveal a single forced answer. Take no more than three answers; reveal/label after they reason.	Choice plus one reason.
5–13	Textbook options on p. 27: Read and Write (internal/external influences); Listen and Speak (present one plan element); Build It (PEST analysis). These are choices, not three automatic assignments.	Fill/retrieve matching notes.
13–27	Read only the selected p. 27 prompt if one is confirmed. Until then, use p. 26 Market This as an ungraded rehearsal and reopen the relevant source pages.	Read and point to source evidence.
27–36	If no task is selected, finish the rehearsal/review. If selected, display the exact deliverable, time, criteria, and confirmed submission route; model process, not student answers.	Saved work or exact unfinished item.
36–40	Prompt: Does the suggested response address a factor the business can control, a factor it must respond to, or both? Key: Accept either when the student identifies which and supports the explanation.	Term/concept plus reason.
40–42	Save and state next task. Record selected task, actual work completed, and the SBTE-confirmed next step. Do not create a Chapter 2 rubric or test schedule by inference.	Clear restart point.

Words to use at the transition “We are practicing with the chapter. Once the SBTE chooses a p. 27 task, I will show you its exact directions.”

If short on time Finish the reading at the actual paragraph reached, then carry the remaining work into the next block. Do not claim this session completed merely because it was planned.

Teacher checkpoints and handoff

Textbook-controlled vocabulary

Term	Student-friendly check	Controlling source
marketing plan	What does this roadmap guide, and how will the business know it worked?	p. 18
PEST analysis	Which external condition is political, economic, social, or technological?	p. 20, Figure 2.1
SMART goal	Can we identify the specific measurable result and deadline?	pp. 20–21; “Results-focused”
customer profile	What customer evidence describes the likely buyer?	p. 24
metrics	What count/measure matches the goal?	p. 26
bibliography	Which works were referred to in the plan?	p. 26

Confirm, do not assume

- The chapter, notes, Terms to Know, and review files must be visible/approved in Teams before asking students to download or submit them.
- Set Terms/notes/review deadlines and any vocabulary quiz, project, presentation, or test date only after SBTE/Teams confirmation. Chapter 1 dates do not transfer to Chapter 2.
- Choose any graded p. 27 application and its format/rubric with the SBTE. The plan supplies a complete ungraded practice route while that decision is open.
- Keep Block 1 and Block 5 separate: check real progress and finish points; do not infer one class reached the other’s page.

Two-section stop record

Section	Last printed page / heading	Notes / term / review stop	Next opening
Block 1	_____	_____	_____
Block 5	_____	_____	_____

Evidence behind the baseline

Evidence scope and authority Targeted Chapter 1-relevant local placement records were checked against classroom plans, the original Chapter 1 assignments, and the Chapter 2 textbook (printed pp. 17–27). The September 14–16 class records establish routine and file handling; September 22–25 records show group work, review/quiz, and selected applications; September 30 planning explicitly calls for a Chapter 1-style Chapter 2 layout before later improvement. The textbook controls Chapter 2 terminology, figures, page order, and p. 27 options. Planning conversations are not proof a Chapter 2 task was posted or completed.

Source-state boundary School/SBTE directions, observed Chapter 1 practice, Piter-created supports, later refinements, textbook requirements, and unresolved Chapter 2 decisions are kept distinct above. Private classroom evidence informed this de-identified guide; no student names or raw records are reproduced. Phase 2 improvement candidates — NOT part of baseline: revisit access supports, student agency, differentiated checks, and assessment design after independent review.
