

Goods, services, ideas

TIME: 3 min

SAY

“Left → middle → right: what does each customer get?”

DO • 1 Think silently 2 Ask across the room 3 Reveal

Show the three-part scene; allow 20 seconds of silent thought; ask everyone to point or jot one category. Take two voices beyond the usual volunteers. Reveal the words only after answers. Then hand back to the SBTE for the Chapter 1 Create and Design assignment.

Before the 2.x assessment

TIME: 1 min

SAY

“Open Word. Find one command from 2.1–2.4 using Search. Then return to your assessment instructions.”

DO • 1 Point to task 2 Pause and scan 3 Release

do not teach test steps; use the 1-minute Search reminder, then release to the 2.x assessment.

One function, one purpose

TIME: 4 min

SAY

“Which marketing function is happening here? What job does it do?”

DO • 1 Think silently 2 Ask across the room 3 Reveal

image first. Ask for the action, then name the function. Ask one student to state its purpose in a sentence. Use this to launch Listen and Speak only if the SBTE confirms the function-selection method and work time.

Start Word 3.x

TIME: 2 min

SAY

“Read the instruction first. Highlight the action verb. Find that command in Word before changing the document.”

DO • 1 Point to task 2 Pause and scan 3 Release

model only the read-find-check routine, not an unverified 3.x step.

Function and marketing concept

TIME: 4 min

SAY

“How could this choice satisfy a customer want and help the business earn a profit?”

DO · 1 Think silently 2 Ask across the room 3 Reveal

Start with the customer evidence in the image. Ask for a want, not an invented need. Invite written or spoken responses. Reveal the term, then connect to the rubric's second content requirement.

Word 3.x: spot the target

TIME: 2 min

SAY

“What must the finished document look like? Point to the instruction that tells you.”

DO • 1 Point to task 2 Pause and scan 3 Release

have students locate a target in their live directions; no fabricated page number.

A specific example

TIME: 4 min

SAY

“Name one action this business could take. How does that show the function?”

DO • 1 Think silently 2 Ask across the room 3 Reveal

Use the scene to elicit a specific example. Ask “what did the business do?” and “why is that this function?” Let students point, write, or speak; reveal after response.

Word 3.x: troubleshoot

TIME: 2 min

SAY

“A command is missing from the pictured menu. What will you search for?”

DO • 1 Point to task 2 Pause and scan 3 Release

use the documented 2.x mismatch as a general workplace troubleshooting routine, not as a claim that 3.x has the same issue.

Explain it in one minute

TIME: 5 min

SAY

**“Function → purpose → marketing concept → example.
Which link needs more work?”**

DO • 1 Think silently 2 Ask across the room 3 Reveal

use a short rehearsal, not a graded presentation. Students may use notes; invite a partner or private written check. Do not announce presentations or due dates without live SBTE confirmation.

Word 3.x: check and continue

TIME: 2 min

SAY

“Find one result you are confident in and one step you want to verify.”

DO · 1 Point to task 2 Pause and scan 3 Release

quick independent check and precise-help request.
