

Recreate a Pattern Found in Tinkercad

Piter Garcia

March 20, 2026

Quick Scan

- Grade: Grade 5
- Workbook sessions: Session 22
- Class blocks: Day 2 10:45-11:35 Pickett, Day 3 10:45-11:35 McGlashon, Day 5 10:45-11:35 Pecora
- Reference file: recreate-a-pattern-found-in-tinkercad.bib

School Planning Goals and Inclusion

- What is expected: I can document progress while following the computational thinking process: decomposition, pattern recognition, abstraction, and algorithm. (4-6.CT.4) | I can identify pieces of information that I might need to change as the program runs in order to get the result I am seeking. (4-6.CT.7) | I can create patterns by using the “Repeat” block and “Count with” block. (4-6.CT.8)
- What we achieved: This lesson points to local transcript or evidence files in the workspace so the packet can be revised from what actually happened in class.
- What needs improvement: stronger proof, cleaner assessment notes, and tighter lesson artifacts.
- How to improve: add transcript proof, one saved artifact, and clearer success criteria.
- Inclusion focus: use visual modeling, chunked directions, predictable routines, and flexible participation roles.
